

Documentation: License File Management

Instructions for updating your Scalix license file

The Scalix license file provides permissions to your Scalix Server for use based on your purchase. You may need to add a new license file to your server, when you make changes to your Scalix product. Some examples include:

- Upgrading from Community Edition to Either Small Business or Enterprise Editions
- Adding additional Premium Users
- Updating your list of e-mail domains
- Renewing your Software Subscription Service

This page provides step-by-step instructions for updating your Scalix license file.

1. Launch the Scalix Admin Console (SAC) and log in
2. Click the Settings toolbar button
3. Click the Scalix Server item in left pane
4. Click the License tab in right pane
5. Click the Install License button
6. Cut and paste the entire texts below:

```
--Scalix License Key  
Key Type: Enterprise Edition  
License Type: Permanent  
System Class: Multi-Server  
Domain: foobar20060721a.com  
LVID: 2007-07-21  
Premium Users: 55  
Standard Users: unlimited
```

```
--Scalix License Signature
